What is Open Access?
Open Access is an initiative that aims to make scientific research freely available to all. To date our community has made over 100 million downloads. It's based on principles of collaboration, unobstructed discovery, and, most importantly, scientific progression. As PhD students, we found it difficult to access the research we needed, so we decided to create a new Open Access publisher that levels the playing field for scientists across the world. How? By making research easy to access, and puts the academic needs of the researchers before the business interests of publishers.
Authors, Editors and Institutions
We are a community of more than 103,000 authors and editors from 3,291 institutions spanning 160 countries, including Nobel Prize winners and some of the world's most-cited researchers. Publishing on IntechOpen allows authors to earn citations and find new collaborators, meaning more people see your work not only from your own field of study, but from other related fields too.

Careers
Our team is growing all the time, so we're always on the lookout for smart people who want to help us reshape the world of scientific publishing.

Denis Coelho
Jönköping University Sweden

Professor Denis Coelho's main teaching contribution has been stimulating the formation and initial operation of graduate courses in Industrial Design and MA in Industrial Design Engineering at UBI. He develops scientific activity within product design methodologies and has also conducted research in the field of ergonomic design and human requirements on technology, developed extensively in his doctoral work. Professor Coelho collaborates with several international research institutions in the areas of product design and ergonomics. The key area of his scientific activity is focused on the Human Interface located between technology and humans, which is characterized by an interdisciplinary nature, with technical and technological bias favouring an ergonomic perspective. His scientific activity also extends to product design methodologies, normalization applied to industrial management systems and production strategy in international networks. He is editor in chief of the International Journal of Human Factors and Ergonomics.

Latest work with IntechOpen by Denis Coelho

A fast paced changing world requires dynamic methods and robust theories to enable designers to deal with the new product development landscape successfully and make a difference in an

increasingly interconnected world. Designers continue stretching the boundaries of their discipline, and trail new paths in interdisciplinary domains, constantly moving the frontiers of their practice farther. This book, the successor to "Industrial Design - New Frontiers" (2011), develops the concepts present in the previous book further, as well as reaching new areas of theory and practice in industrial design. "Advances in Industrial Design Engineering" assists readers in leaping forward in their own practice and in preparing new design research that is relevant and aligned with the current challenges of this fascinating field.

Chapters authored

Technology as a Determinant of Object Shape

By Denis A. Coelho and Filipe A. A. Corda

Part of the book: Industrial Design

Culturally Inspired Design: Product Personalities to Capture Cultural Aspects

By Denis A. Coelho, Ana S. C. Silva and Carla S. M. Simão

Part of the book: Industrial Design

Biologically Inspired Design: Methods and Validation

By Carlos A. M. Versos and Denis A. Coelho

Part of the book: Industrial Design

A Bi-Directional Method for Bionic Design with Examples

By Carlos A. M. Versos and Denis A. Coelho

Part of the book: Advances in Industrial Design Engineering

Call for Authors
Submit your work to IntechOpen

In addition to well-established academics in the field of scientific research, we also welcome and encourage the next up-and-coming generation of scientists looking to make their mark. No matter where you are in your career, we would welcome you and encourage you to consider joining our community.
